As President Shonts, head of the New York Railways Company, has stated positively his company will never recognize the union, a strike on their lines seems inevitable. And as the work of enrolling employees of subway and elevated has gone on rapidly during the last few days, a general strike on all lines is more than likely.

Mayor Mitchel received a copy of the demands prior to their presentaion to the companies as a result of a promise by President Mahon to kee him informed in advance of any action the men were going to take. Mayor Mitchel and President Mahon both denied a report that the latter had threatened to call out the men on the green line cars to-me row, thus crippling the trolley service of the city.
